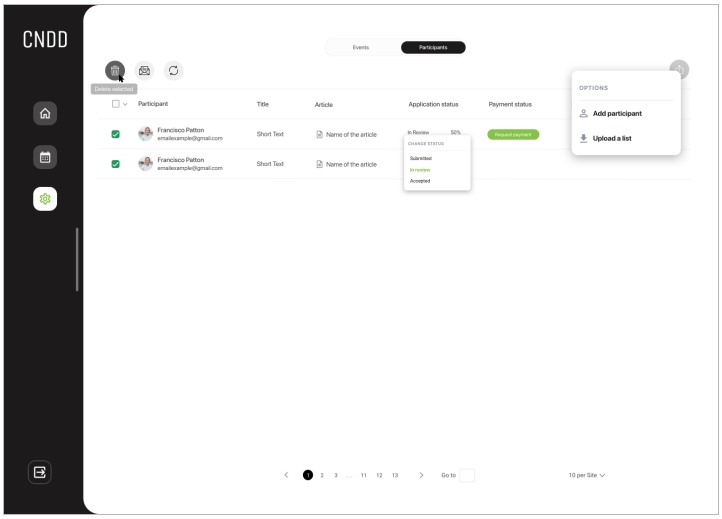
Upload List of Participants

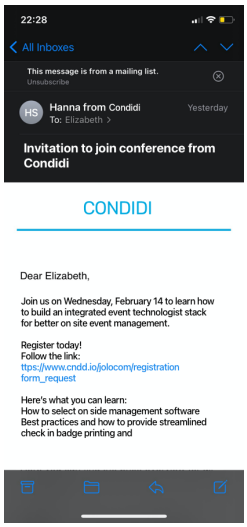
Description

As an Organiser I want to upload lists of participants of a conference

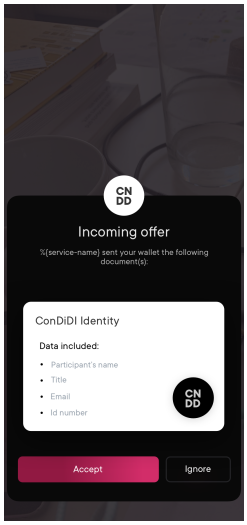
As an input Organizer uses a CSV list that is managed outside of the system and uploads via CONDIDi Admin Area.
(https://app.zeplin.io/project/5fd0b3920830d04e256b659b/screen/5fd0b406f7690142db84b36a)



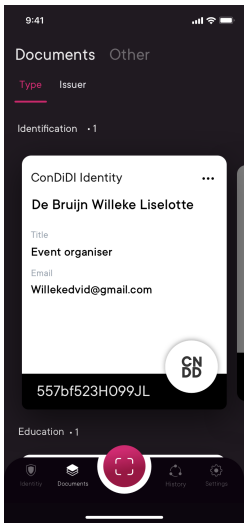
CONDIDi Backend parses the CSV file and creates a record for each new participant in its Database, requests Jolocom SDK for issuing a Deeplink to the SW, sends out an Email invitation with the Deeplink and represents all of the Participants in a form of a Table on an Admin Area Page.



If the user doesn't have the SW APP he has to install it from Google Play or Apple Store and then clicks the Deeplink from his Email.
By opening the Deeplink in the SW, SW offers to create the Condidi Identity:



Once the User accepts the Offer the Identity creates and shows in his Documents:



Jolocom SDK sends a request to the Condidi Backend with ConDIDi User ID and Jolocom Condidi Credential ID.

Data Structure

- ConDIDi User ID;
- User first name;
- User last name;
- Title
- User email;

Tasks/User Stories

Aa Card	Environment
Create an API Endpoint enables Universal Link generation	Jolocom SDK
Create Universal Link generation feature	Jolocom SDK
Define Condidi Identity Credential scheme	Jolocom SDK
Create Condidi Identity Credential Selection request	Jolocom SDK
Create Condidi Identity Credential Issuance	Jolocom SDK
Create Condidi fallback method	Jolocom SDK
Create Condidi Identity offer Popup and connect to API	SmartWallet Frontend
Adjust Existing Documents page for the Condidi Identity Card	SmartWallet Frontend
Retrieve Condidi Identity Deeplink	SmartWallet Frontend
